Dear Source Water & UIC Section Ryan Hancharick,

I am demanding you to DENY the proposed Plum Injection Well, Sedat #4A. Injection Wells like this put drinking water at risk and coincide with a plethora of other impacts. When this injection well fails and contaminates Allegheny County's drinking water, residents could potentially be exposed to chemicals that will cause long-term health issues, including cancers, heart and lung disease, liver and kidney toxicity, etc. Allowing this Injection Well to operate will violate my right as a Pennsylvania citizen to pure water as stated in Article I, Section 27 of the Pennsylvania Constitution.

Sincerely,

Non-responsive based on revised scope.
